Pull Together

November 17

ADDITIONAL LOCAL NEWS.

Mr. Miller, of Los Angeles, California, is in town this week the guest of Dr. Stines.

While fishing down below the power house yesterday, Mr. Ireland caught a fine big jack fish weighing seven and three-quarter pounds.

One of the best indications that the lumber business is picking up is that Jimmy Henry submitted that he himself had worked for two whole days this week.

Messrs. Homer, Lockwood and Wheeler left last night for Harrogate, to inspect the drilling operations there. They expect to return to Redcliff early next week.

The regular weekly shoot of the Redcliff Gun Club will be held at the grounds on the north side of the track to-morrow afternoon. A large number of the local cranks will be present, and some fast work is expected.

Remember the lecture in the Kingsmen Theatre next Sunday evening, when Rev. Morrow of Medicine Hat will have for his subject "Irish wit and humor." The proceeds go to the Presbyterian church building fund.

The J. L. Landis Company received word from Calgary yesterday to the effect that oil had been struck in the Dugan well at depth of about 2,000 feet. The oil land owned by the Landis Company of this town is in close proximity to the Dugan well.

John Buxton, who revealed to the police the details of the sensational Krafchick escape and at the same time to Krafchick's hiding place, was prevented from entering the States by American officers, on the ground that he was an undesirable.

The trial of Alex Anderson which started in Medicine Hat this week was brought to a sudden close yesterday as the judge decided Anderson was insane and a trial was not lawful. Anderson was charged with murdering his wife in July of last year.

Mr. J. S. Tupper, of Gibson & Tupper, returned this morning from a business trip to Hardin, Mont. He was accompanied by S. R. Gibson, of Hardin, who may become a resident of Redcliff.

The Review appears this week with eight pages all home print. This shows that the Review office is sufficiently equipped with type and machinery to enable it to keep pace with the growth and development of the town along other lines.

Medicine Hat now has senior and intermediate amateur baseball leagues in the city. There are four teams in each league. If Redcliff would get busy and organize there should be no trouble arranging regular games for all seasons.

To-day Mr. C. S. Rice, secretary of the board of trade, is visiting a unit that absolutely refuses to come off. We noticed it and after making enquiries learned that Mrs. Rice and daughter are expected to arrive to-night. They are coming here to reside permanently. We can quite appreciate Mr. Rice's feeling as Mr.

Stines and son will also be among our permanent citizens next week.

Mr. R. W. Allan, of Hays, was the guest of Mr. Oakes at the Laurel Hotel this week. He was so greatly impressed with Redcliff's future prospects that he intended in some real estate.

The bus which runs between here and the Hat is now out on regular regular trips between the two cities. During baseball season the bus will be run on a daily schedule those who wish to see the cycling games.

The Entire News Club will hold its last scheduled dance of the season at the Palace Hall on Friday evening, May 1, instead of April 30. Dancing commences at 8:15 o'clock sharp. All persons holding invitations are cordially invited to attend.

The new program for the M. C. L. Sunday meetings to be held during the next three months are now being circulated. The program provides for an excellent list of subjects to be dealt with by a number of speakers from a distance.

Councillor Plath returned last Saturday from Edmonton, where he had been consulting the Attorney-General's department in connection with the proposed changes in the voters' list here. When seen by a representative of The Review Mr. Plath said he had nothing to say regarding the information he obtained in the matter.

Mr. Lucas, of Regina, was in town for a few days this week. Mr. Lucas was here as a representative of a number of Regina capitalists who have considerable money invested here and said when he returned to Regina he would be able to tell his friends Redcliff is one of the best towns in the West. He expects when he gets back to Regina and tells the people what is going on here they will all want to come here to live.

The fine new solid brick house being built on the corner of 4th Street and 4th Avenue by Mr. Turnbull is now nearing completion. The house is one of the best in town. It is being built by a firm of architects and is being finished throughout with the best material. When finished this will be one of the best residences in town. Mr. Martin, of the Martin, Archibald Co. will occupy the house when completed.

Messrs. A. J. H. Day and J. Day were visitors in town last Wednesday. These gentlemen are ranchmen in this district. They found it hard to realize that on the bald prairie on which they herded cattle and picked mushrooms just a few years ago the prosperous industrial centre of Redcliff now stands. Mr. Bryson won the championship in the riding contest at the Stampede in Winnipeg last year.

Band Concert by Salvation Army. The Medicine Hat Salvation Army band will give a concert in the Amuse U Theatre here on Tuesday, April 28. The program will consist selections by the full band, also solo duets and quartets, both vocal and instrumental by members of the band. Everybody is invited.

President Bemoans Loss of Life in War

"The sorry, terribly sorry," were President Wilson's first words when news of the loss of life in taking Vera Cruz first reached him. To-day the President was sad and disheartened. As he walked slowly to his office through the White House his head was bowed and his face showed deep feeling.

The President had hoped that the seizure of Vera Cruz might have been accomplished without loss of life. He has determined, however, that there shall be no backward step. He is trying to avoid war and prevent further bloodshed, but he realizes that the American people want to see the flag upheld.

For the present the United States will content itself with holding the customs house at Vera Cruz, collecting duties and preventing shipments of arms from reaching Huerta.

CHURCH NOTICES

Church of England.

Thursday, April 23, vestry meeting at the vicarage, 9 p. m. at 10 a. m. at 11 a. m. at 12 a. m. at 1 p. m. at 2 p. m. at 3 p. m. at 4 p. m. at 5 p. m. at 6 p. m. at 7 p. m. at 8 p. m. at 9 p. m. at 10 WESTERN HOME MARKET

The Army of Consumers Make It an Inviting Field for Manufacturers

Some idea of the enormous consumption power of the Prairie Provinces may be gathered from the statistics supplied by the Winnipeg Industrial Bureau; who, at great expense, have accumulated the number of straight cutlery, knives, and blades in the year 1911. The following are a few of the figures:

Agricultural implements, 2,150; wire, nails, fencing, 1,500; crockery, 1,000; furniture, 1,200; hardware, 1,042; sugar, 912; paper, 942; machinery, 745; marriages and wagons, 115; iron pipe, 682; stove and range, 165; canned goods, 671; brick, 635; barrels, 611; sewer and drain pipe, 661; automobiles, 126; glass (window and plate) 664.

These are only a few of the principal items. Already a stir is being made in the manufacture of some of these lines in the West. There is abundant opportunity, however, for new factories. When these thousands of articles of products, the bulk of which are now manufactured in Eastern Canada, are turned out in Western workshops, employment will be furnished for an army of workmen, with their wives and families, will provide a profitable market for the varied products of the farming community. But what is perhaps more important from a national standpoint, the manufacture of the vast quantities of goods now imported from the United States will rapidly increase in the West. In the next few years if our present trade policy is maintained. The time will come when the West will be able to supply sufficiently for practically all its needs. Already many American factories are looking towards the West. This is a most desirable movement as it retains in Canada money which would otherwise be circulated among the workmen, merchants and farmers of the United States. Every Canadian, whether he is of the East or West, should be firm advocates of the policy which is calculated to further manufacturing development in the middle West, and thus create a balance wheel for the enormous expansion of the movement which has taken place in that section of the country during the past decade.

ARMY OF DINNER-PAIS

Meese Jaws' Aim is to be All-round Successful City

President Crisholm, of the Moose Jaw Board of Trade, in his annual address to that body early in the year, emphasized the necessity of manufacturing development in the West as the key to the success of the successful, well rounded city. In the course of his address he said: "The people are here, the market is here, we must be the manufacturer to supply our needs. One fact which must not be lost sight of, and indeed, must be impressed more and more on the minds of the citizens of Moose Jaw, is this, that in order that this city shall be established as a strong economical base it must be the center of all full-time plants in other words—It is the volume of industrial workers who are and will be the mainstay of any important city. Therefore our great need is manufacturing and industrial concerns. And as the security of manufacturing in the West as our city is a work that requires great experience and knowledge of manufacturers, and as a profession of its own, and every city of any note in the country employs an expert to look after this work." Fortunately Canada's trade policy for the past twenty years has directly encouraged the establishment of manufacturing industries, both in Western and Eastern Canada, and if this policy is maintained, it is safe to predict that Moose Jaw's ambitions will be realized.

SELF-HELP IN THE FACTORY

Employer and Employee Co-operate in a Big Rubber Company

An employees' mutual benefit society has just been organized by one of Canada's largest rubber companies for the purpose of rendering assistance to employees in cases of sickness, death and of supplying them with medical attendance. Men are entitled to \$4 per week for the first year, while they are incapacitated by sickness; women and all others are entitled to \$3 per week for the first year, while they are incapacitated by sickness. A clause provides that no benefits shall be paid in cases where sickness is the result of intoxication or immoral conduct. The sum of \$25 will be paid to assist in defraying the funeral expenses of a deceased member. The establishment of such societies as this improves the relations between employer and employee. Moreover, experts state that little difficulty will be encountered in selecting an expert team of workers' compensation to the conditions created by such societies.

DOLLARS FROM MILK

The Cow as a Bread-Winner Helps its Owner to Coin Money

In 1909 the representative of one of the largest condensed milk companies in the United States, interviewed the Town Council of Tillamook, Oregon, with a view to securing their co-operation in the establishment of a milk factory in that town. It did not take the live merchants of Tillamook long to realize that the five or six thousand dollars, which the company proposed to distribute to the milk producers around Tillamook each month, would add to the circulation over the country of their stores. An ask merchant put it: "The increase in the price of milk would add per year more for his wife in addition to many other equally necessary things."

On the first of October, 1909, the factory opened its doors and 31,000 pounds of milk went into the condenser. After four years operation it is interesting to note the effect of this industry in the neighborhood. Prior to the establishment of the factory, farmers had been getting from 80c to 11c per cwt. for milk. In 1913 the price had risen to 14.4-13.0 per cwt. The price has risen continuously. The price is now \$1.45 per cwt. with prospects of going higher next year. From 1909 to 1913, 10,000 pounds from a few farmers the factory has increased its capacity until it now takes care of 113 patrons and 181,000 pounds of milk in one day.

The industry in question, The Borden Condensed Milk Company, had its roots planted entirely in the United States, but the tariff, coupled with its growing trade in Canada, were the factors which induced it to locate a branch in Tillamook. The company's scientific method and its educational efforts to improve cattle-raising with a view to better milk production have been of tremendous value to the country. Cows have gone up in price. Where formerly an ordinary grade Holstein sold at \$40 to \$50 it now brings from \$75 to \$100, and there has been a corresponding increase in good milkers—old pure bred.

Some interesting figures are available from some of the patrons. One farmer from eight cows during eight months time received \$1,057.36 in cheques from the Borden factory. Certain parts of the Western country are entirely suited for dairying, and there is no doubt that within a few years condensed milk factories will be established at different points in the West, thus creating a profitable home market for milk and cows.

SHOULD BE GROWN AT HOME

C.P.R. Vice-President Would Change Farming Methods in the West

In the course of a very interesting speech before the Regina Board of Trade the other day, Mr. George Henry, Vice-President and General Manager of the C.P.R., made some very interesting remarks. After discussing the policy of the Company as it concerned Western Canada particularly, he emphasized his belief in the home market for the products of the West. The importance of the home market for the year ending March, 1914, amounted to \$470,000,000, while the amount of exports was \$1,000,000,000. Just think of our important position and a half million dollars' worth of fruit, only a small proportion of which cannot be grown in this country. Imagine us importing three and a quarter million dollars' worth of vegetables and thirty-three and a half million dollars' worth of wool and its manufactures, when we consider that the sheep industry lends itself particularly to the development of the West. A report published in 1913 disclosed the fact that in Canada there were 2,100,000 head of sheep, while in the United States there were 25,000,000 and in Australia 25,000,000, and even in Great Britain 25,000,000. Also, just think the 11,000,000 head of milk cows produced in Canada in 1913, all the straw of which was destroyed. This straw properly manipulated, could have produced 30,000 tons of commercially salable hay. She, which, at Canadian prices, would have yielded something like \$60,000,000. At the present time Western Canada, with a population of two million people, is importing a large proportion of its food and necessities from the United States, the East and elsewhere. Further on in his address Mr. Henry drew attention to the desirability of the Western Boards of Trade working out a policy for the development of water-power resources. He said, "It is a pity that we have not been able to supply cheaply to farmers."

A FRESHLY WASHED

is greeted in Saskatoon, Kan., for the Great Western Furniture Co.

Shooters Must

Have Game License

All residents of the province, residing to the south of the fifty-fifth parallel who are not farmers residing on their farms, or members of such farmers' families residing with them on the farm, require a license before hunting or shooting any game birds. This license will cost \$1.00. Although the open season for ducks and swans is now a little later in the year, being September 1st, to October 31st, it was the 23rd of August and extending until the 11th of December, the shooting of wild geese is permitted at any season of the year excepting Saturdays, and between one hour after sunset and one hour before sunrise. The fish of this bird must not be trifled with in without first obtaining the license provided for by section 16 of the act. The license for bird game, which is in previous years cost, the sportsman \$1.00, is now \$2.25.

As a great many of the residents of the province are interested themselves in fox farming there is now a close season on foxes extending from April 1st to November 1st. It is also illegal during this time no person may hunt, trap, take, shoot, at, wound or kill any fox without first obtaining a special permit to do so. It is also illegal for any person to export beyond the boundaries of the Province of Alberta any live foxes without first obtaining a permit, which in the case of animals reared on fur farms will cost \$15. In the case of animals not reared on fur farms the fee is \$100 for each and every black or silver fox to be exported and \$15 for each and every animal of any other species of the family. Copies of the regulations relating to foxes may be had on application to any person transacting on fox farm contrary to any warning notice is liable to a penalty of not less than \$10 and not more than \$200, with costs in each case.

A NOVEL METHOD TO

DEFEAT LIQUOR LICENSE.

One of the most practical methods for preventing the opening of a saloon in a new district has been exemplified by the time being in the West. It has been taken by the residents of Highlands, a rising town on the Goose Lake extension of the C.P.R.

A site having been secured for the building construction having been commenced there, who favor total prohibition quietly engineered the purchase of some adjacent lots on which to build a union church and school. As the law prevents the sale of any place licensed to sell intoxicating liquors within 500 yards of a church or school, when the application for a license for the proposed hotel came before the licensing commissioners they had no alternative but to refuse to grant it. The dis-pleasant, who had contributed toward the cost of erecting the church and school, discovered to his astonishment that he had been instrumental in assisting to deprive himself of a license for his new venture. Obviously the promoters of the church and school projects worked the oracle in secret, hence their success for the time being. They exemplified an alertness that prohibitionists cannot but admire, and they have set an example of accomplishing by private effort that which sets a precedent for other places, similarly situated, to follow. The case presents some of the features of quiet opera, in the laugh all on one side.

PANAMA CANAL WILL

MEAN SAVING FOR ALBERTA

With the opening of the Panama Canal Alberta farmers will make a saving of five cents a bushel on all wheat exported owing to lower freight rates. The London Daily Chronicle, commenting on the same subject, suggests that the time may come when the centre of gravity of the Dominion will change from the east to west, with Vancouver as the empire centre for wheat, instead of Liverpool.

HITS FROM RHARD WIFE.

"Marry a bright woman for success and a pretty woman for happiness," says a Kansas editor. But who wants to go to bed for bigamy, we would like to know.

Tell your friend that he knows more than you do and will continue to be your friend. Every man with a narrow view of life should take a walk out in the woods and see what is going on. Some men who have fallen in every business they tried get the idea that they can succeed everywhere. They are the business of the people.

A man's idea of heaven is a place where there is never any house-cleaning.

The average man cannot have a good time and save money, too. Never tell a man who has fallen how he might have avoided failure; tell him how he may become successful again.

A blue sky has a tendency to drive away the blues.

SPECIAL SERVICE FOR

STOCK SHIPMENTS.

In order that the Canadian Pacific Railway Company may more promptly and efficiently handle stock shipments other than train loads, they have decided to institute following days on the different subdivisions for the handling of such shipments, and if shippers will co-operate, in so far as in their power, by making their shipments on these specified days the maximum benefit will be gained from these arrangements.

Points between Swift Current and Medicine Hat, Bassano and Calgary, Lethbridge and Acton, and Jernigan and Bassano on Wednesday of each week. Westhead, between Medicine Hat and Edmonton on Wednesday, west-bound on the Lethbridge subdivision on Thursday. Points between Coutts and Lethbridge on Wednesday and Thursday between Calgary and Lethbridge on Thursday.

FLASHES.

That man is playing in luck who can stretch the truth without breaking his word.

Some people are so fresh that we always feel like taking them with a grain of salt.

Many a fellow who trusts to luck eventually gets there, but he often has to walk home.

Some people who never were happy unless they felt they had more happiness than anybody else.

A man may be as young as he feels, but he never always looks the same.

Flatter a woman and she will be wiser. Tell her the truth and she won't.

It's all right to love your enemies, but don't do it at the expense of your friends.

Some fellows divide their time between being roasted and being kept in hot water.

Some people have an idea that reform only makes the world better by making it more uncomfortable.

Beauty is only skin deep, but ugliness is only skin deep.

The only real proof of success is an ability to hold onto it.

Prejudice goes forward and you won't have so many kicks coming.

The theories that make the most noise are the exploded ones.

SOME OF FELS' SAYINGS.

The world has begun to quote what Joseph Fels said when he was in the flesh. There is now, since his spirit laid away the body it has inhabited for sixty years, a real news and social value in what he said and did. The world has awakened to the fact that Joseph Fels was a real man, a real social force. Here are some of his sayings that made him such an interesting figure:

One of the hardest things is to convince the man with a full stomach that there is somebody hungry.

I do not believe in anything being taxed that is not paid and did. The world has awakened to the fact that Joseph Fels was a real man, a real social force. Here are some of his sayings that made him such an interesting figure:

I do not believe people are lazy by nature; they are lazy by reason of being forced to be lazy.

There is no such thing as monopoly of labor; there is monopoly of land.

I sometimes think that we Americans are not really tricked and fooled people on earth.

If we had an educational fund of \$1,000,000 a year, we'd spend the world in twenty years, as so economic conditions. I wish to be one of ten to supply the funds.

We can not get rich under present conditions without robbing someone. I have done it and am still doing it. I do not propose to spend the damnable \$100,000,000 of the system by which I made it.

The gentleman who holds a deed to vacant land does not want to dig or build; he wants to use a carving knife on some other man.

A party of 80 boys, ranging from ten to seventeen years, have arrived at Fairbank, Kan., the Canadian centre for the orphan homes of Scotland, and will be distributed to foster homes throughout Canada at an early date.

Almost without warning, an avalanche of rock and rubble, loosened by rains, crashed down the steep slope of the city and fell into the street of Champlain street. The place where the fall took place is close to the spot where the terrible landslide of 1888 killed 54 residents of the street and crashed in a row of houses under the cliff as if they had been exploded. No lives were lost on this occasion.

C. A. Magrath, C.E., chairman of the public roads and highways commission for the Province of Ontario, which recently reported to the Legislature, has been elected to the position for his services to the Provincial Government in connection with the campaign's work. Mr. Magrath was one time member in the federal house for this constituency.

Sam Aldridge, who last Wednesday escaped from the mounted police at St. Paul, de la Roche, and was captured by officers after a desperate struggle in which he was disabled by being shot twice, died last Sunday as a result of the wounds he received.

Although he had received two bullets, one in the leg and one in the leg and one in the shoulder, the police did not consider that he was dangerously injured. The bullet which entered his leg beneath the arm passed through his right lung and emerged at the back of the neck, and hemorrhages of the lung ended and resulted in death. Aldridge was a desperate man and had been the terror of the district north of Edmonton for several months.

A cable from Belfast says: "Undoubtedly are deeply grateful to their Winnipeg sympathizers in rendering them a function where the toast to the Pope's health took precedence over that of the King."

Every wheel on the Canadian Pacific railway system was still on Wednesday afternoon at 2:30 o'clock for one hour, when the funeral service in Knox Presbyterian Church over the body of the late Sir William Whyte was being held. Every department of the railway that could be closed was in darkness during the afternoon out of respect to Sir William's memory and employees attended the funeral in large numbers.

While R. Hoover, a farmer of Melend, thirty-five miles north of North Battleford, on his way to town, a disastrous fire swept across his farm.

Many a fellow who trusts to luck eventually gets there, but he often has to walk home.

Some people who never were happy unless they felt they had more happiness than anybody else.

A man may be as young as he feels, but he never always looks the same.

Flatter a woman and she will be wiser. Tell her the truth and she won't.

It's all right to love your enemies, but don't do it at the expense of your friends.

Some fellows divide their time between being roasted and being kept in hot water.

FRIDAY, APRIL 24, 1914.

WHO IS TO DO IT?

From time to time The Review has drawn the attention of its readers to certain matters which in the interest of the town, need the attention of the citizens. We have also frequently thrown out some suggestions along certain lines which we believe if carried out would result in much good to the town as a whole.

It has been a source of a little satisfaction to us to have people come to us after this paper is out and tell us that such-and-such a suggestion in our last issue was a good one and should be acted upon at once. We begin to think then that life is really "worth while" and that our efforts are bringing forth fruit. But alas, week after week goes by with the same old story—good idea, fine suggestion, but nothing stirring.

If these suggestions are as good as some of our citizens say they are why don't they get busy and do something? What is the use of saying we should have this or we should have that when going way back to sit down and grouch about nothing doing. "Let us then be up and doing." If things are brought to our attention that should be done some one should make the move. The trouble is we are all too anxious to leave the initial move for some one else. How about you, gentle reader, who are reading this article right now. Have you ever done anything to start something going. If not, just try it.

HOW ABOUT THE VOTERS' LIST?

There is still considerable talk both pro and con on the street about the proposed changes in the compiling of our new voters' list. Those in favor of the changes can produce some good arguments in favor of their contention, and can quote legal advice to substantiate their claims. On the other hand there are arguments which undoubtedly go to show that a certain amount of unfairness will result if the proposed changes are put into operation, and those advancing them also have legal advice in support of their contention.

It seems to us very strange that in a matter of such great importance as this there should be any need for the least difference of opinion with regard to what really is the law. Surely the members of parliament who made these laws know what they meant when they had them placed on the statute books and surely it is up to them to impart that knowledge to those concerned so that there will be no need for further quibbling in the matter.

If the wording of the law as it now stands is so ambiguous that this, that and the other lawyer can read a different meaning out of it then it should be changed and put into common, ordinary, every-day, barn-yard English so that it would not be necessary for any council to ask for outside advice.

FIRST STEP TOWARD FERRY.

The work undertaken by the Council to provide a suitable grade for traffic down to the shores of the river will, we are sure, receive the hearty support of every ratepayer.

Although we have had this beautiful stream at our doors, it might as well have been twenty-five miles away, as owing to the treacherous hills and hollows it was almost impossible to get to its banks.

When this grade is completed there is no doubt that the flats along the river will be well patronized for picnics and outings,

as well as furnishing a nice place for visitors to take in some of the excellent scenery surrounding the town.

Apart from this phase of the question it is also a good business move on the part of the Council, as it is the first step toward getting a bridge or ferry across the river to connect the town with the excellent farming country on the other side of the stream.

MAYOR SHOULD HAVE REGULAR OFFICE HOURS.

Now that so many visitors are coming to our town every day, and since most of them are desirous of seeing our good-looking Mayor, would it not be a good idea if His Worship would have stated office hours every day to be at his office in the City Hall to receive visitors, say from 11 to 12 a.m. and 3 to 4 p.m.

Occasionally some of these visitors are desirous of obtaining information regarding the town which the average citizen is not able to give, and as the Mayor is a busy man he cannot always be located.

Since there is no salary in connection with the office of Mayor and since the Mayor has his own personal business to look after this may be too much to expect of him at the same time we think the Council should make some provision for the entertainment of strangers who come here for the purpose of looking over the town with the intention of investing or locating here.

CLEAN UP.

The Mayor and Council are certainly to be congratulated on the vast improvement they have made in the appearance of our town as a result of the past week's cleaning up. Our streets and vacant lots are now in such a clean, tidy condition that visi-

tors have not failed to notice it. This is as it should be. Each of these visitors is an advertiser, consciously or unconsciously. As the impression these people receive of Redcliff is favorable or otherwise, so this town is advertised in all parts of the world.

The moral is obvious. From a business viewpoint we cannot afford to take any chances. We must clean up and keep cleaned up. Nor should the clean-up habit stop with the Council's work. Each resident should follow the example set by the Council, and see to it that his own property is in keeping with the streets.

It would be a good idea if the Council could make some arrangement with the Government Experimental Farm to secure trees for the citizens to plant around their lots. If this were done it would only be a few years till Redcliff would look like a veritable oasis.

But there is a more serious note to the "clean-up" campaign. The moral effect of freshly painted buildings—exteriors and

interiors—is bound to show within. A cleaner town means a cleaner community. There is a very definite connection between clean premises and clean morals.

The Review is strong for the clean-up campaign. From every view point we believe it will pay the citizens to join with the Council in this matter.

SOME PROBLEMS OF CITY LIFE.

The first of a promised series of articles under the above heading, from the pen of J. S. Woodsworth, secretary of the Canadian Welfare League, has appeared in the "Grain Growers' Guide." The first aspect of the subject dealt with is the cost of living. By means of carefully checked statistics, all of which appear to one familiar with conditions to be rather low, Mr. Woodsworth shows that to support a family decently in Winnipeg an income of \$1,216 a year is necessary. And this provides not one dollar for extra help in the home, and for such an item as education and recreation provides only \$52. The publication of such figures prepared by one

intimately acquainted with conditions in Western Canada should furnish food for thought to those who think of leaving the certain livelihood furnished by the farm for the precarious occupations open to the average man in the city.

Employers of Labor should be protected by Liability Insurance. Let J. J. Landis & Co. write you a policy in a good strong Company.

Redcliff Callies Win from Hat

The boys of the big black and white stripes played their second game of the football season on Saturday, and although the truth must be told, just as if a chap was in the witness box, the best team did not win.

This remark is not in any shape or form made to disparage our fine young lads, but to just insist sufficient ginger into their anatomy to make them get more together and then they need fear no team in the league.

The game started late, as the fellows couldn't get away from work earlier. The team as lined up by Referee Fred Courtneil, were as follows:

Caledonians: Goal, Patterson; backs, Evans and D. Gordon; half backs, W. J. Watson, Blatchley, A. Larnach; forwards, Cameron, Watson, "Dark Horse" Smith and J. Gordon.

Moose: Goal, Bannon; backs, Page, Robson; half backs, Foster, Harbour, Frost; forwards, Freeman, Broden, Stoot, Bennett, Fairless.

The match was a very fast one from the outset. The Medicine Hat team, which were much the heavier, went down at the Callies' goal, only to be repulsed by Evans and Gordon, while the visitors showed some combination and apparent attention to practice, the local boys, though showing brilliant football patches, played recklessly and forced the game too much to 100-yard sprint touch. Big kicking and then having to do a flying rush afterward, even went over a team, but a steady back division is a great asset. Both sides have very great safeties. Both sides are fishing, is sometimes a dangerous man to meet. For instance, he laid out the Hat last afternoon forward Fairless on two occasions, the last by actually putting the fine little player out with a broken shoulder.

The most exciting period of the game was when the only goal of the match was recorded, giving the victory to Redcliff. The visitors scored the goal against themselves. A big rush was made on the Moose strongholds, Gordon making a great shot into the long custodian Bannon. The ball, however, did not go through the goal from Gordon's foot but struck the Hat full back on the head and made the goal by just a few inches.

The game, all through, was really of value for a draw, and while the Callies were trying to get a few new players, the result is greatly to their credit that they could hold off an army of Medicine Hat's best team, what the Callies will do when they try to lay full picked bunch will be interesting to witness, but the boys must practice more, keep shoulders to shoulder, and like the old song, "The World Is Yours!"

SOCCER NOTES.

The two games at last two matches were very satisfactory, the Moose Friday collection plate producing \$14.40 while Saturday night's scrape up showed \$12.50. Pretty good showing during this money making time.

One of the Callies' humorists suggests that, seeing Mayor Blot is a vice president of the club he might find the boys work and they would stick better together.

Will Evans is a great back, and quite an acrobat, but be careful William or you will be making a complete job one of these days by killing an old player or two.

Goal nets have now arrived, so the goal posts will look more like bushes at the next match.

Twenty-two Caledonians turning out to a practice game a week ago and every man signing up is what might be termed excellent business.

President Don McLaughlin has amongst his many recent discoveries searched a dark horse for centre forward. This mystic gent played in Saturday's game, but did not wear his tackety boots. He must keep more in his place, however, when on the arena.

The Caledonians have made up their mind to win the Medicine Hat new cup and have even made arrangements for its reception and position on the president's home mantelpiece or on the piano.

For fire insurance in good strong companies see J. L. Landis & Co. FARMERS WIFE UP

Over 30,000 acres in Hettlinger and Adams counties were run over by a wild fire which entailed heavy losses at Lamson, S. Dak. The towns people were compelled to make a hard dash to save their towns from destruction, several hundred joining in combating the advance of the flames. The fire originated from cattle from a passing locomotive. Several farmers lost their all.

Agricultural School Courses Are Popular

The School of Agriculture at Oids closed on May 23 and scarcely had the students returned to their respective homes than applications began to come in to Principal Elliott for next year. In one week four applications were received, and literally dozens of letters are being received asking for information with regard to the course, and also for particulars as to the cost of same.

So as to give the students an idea as to what next year's work will be, we might state that the course as put on at the school of Agriculture is designed to be thoroughly practical. The schools are operated by the provincial government and are entirely free, with the exception of the board and lodging, which students have to care for themselves. All hints where students board must register with the principal of the school, and students will only be permitted to board in homes that are registered.

Board room may be secured at from \$5 to \$5.50 per week, and outside of this, the cost of the winter's schooling is very little. From \$5 to \$7 will cover all expenses in connection with notebooks, text books, etc. The students are also asked to deposit \$5 if they are called "cannon money."

Each student is given a certain equipment of chemical apparatus, and chemical and carpenter tools, and if these are returned to the instructor in charge, the \$5 "cannon money" is returned to the students. Indications are that the Oids School of Agriculture will be filled to the "doors" again next fall, notwithstanding the fact that an addition to the livestock judging pavilion is being added to help care for the very large enrolment.

All those who are interested in the School of Agriculture, and would like further particulars, are invited to correspond with the principal.

CULTIVATING LAND REGULATES CLIMATE.

The control of climate is evidently not merely a dream of the future but an accomplished fact.

An one would expect, some of the most interesting results in the way of artificial interference with climate are to be found in the case of those countries which have been colonized within comparatively recent times.

The breaking up of the vast prairie lands in Canada and the United States having a very radical effect upon the temperature of many districts. The experience of those who have investigated the matter goes to show that the more land is broken up and cultivated the more even is the temperature.

That great dread of the West is being pushed farther north year by year. Mr. J. Obed Smith, assistant superintendent of immigration for Canada, says that, 25 years ago in Manitoba summer frosts were expected as a natural and inevitable event; the only question agitating the farmer's mind was whether the visitation would be severe enough to damage the crops. At the present time the question of summer frosts has become almost a tradition; for a generation the farmers have scarcely been troubled at all in this direction. It is not only in the summer (but in the winter as well) that an increase of temperature is to be noticed.

YOUNG LADY'S GARTER CAUSES MUCH TROUBLE

Garter, garter, who unbuckled the garter? Rev. Charles H. Hyles, pastor of the Congregational Church, didn't. The board of trustees of the church say so. Miss Lucille Clark, seventeen, member of the church, has a garter that in some mysterious and baffling fashion slipped its moorings while the owner wearing it at a dinner party. At the time she was sitting near Rev. Mr. Hyles. The minister is to be twenty-six, single, and still a student of the University of Chicago.

The incident has stirred Lockport and divided the congregation of the church into two factions; those who think the minister did and those who think he didn't. The former faction is headed by Miss Clark. And there you are.

CHICK CHAT.

Hatch your chicks in April or early in May if you want winter layers. Keep them growing continuously, as while you are growing your chicks you are growing your eggs.

Young chicks are babies—treat them as such.

Do not feed the chicks for at least thirty-six hours after they are hatched, as feeding too soon overtaxes their digestive system and causes diarrhoea.

Dust the setting hens and keep them free from lice at all times.

Protect your chicks against chilling when transferring them to the brooder or coop. Have your brooder clean, directed and heated before transferring the chicks from the incubator to the brooder. Use chaff or litter in the brooder. Never use damp or musty litter.

Teach the chicks that under the hover is their source of heat supply. A little patience in this matter will save many from sickness or death through chilling. If chicks huddle together the brooder is too cold; if they scatter to the corners it is too hot.

Remember that unsanitary or damp conditions breed lice and disease. Disinfect the brooder or coop occasionally, and clean out the brooder coop often and renew the chaff.

Give chicks grit for the first feed. It is advisable to feed commercial chick food for the first two weeks. Where commercial chick is not used feed stale bread crumbs, rolled oats or granulated oat meal.

Hard boiled eggs may be fed occasionally, but should be given with other foods or fed sparingly.

After the chicks are two weeks old they can be gradually weaned to cracked wheat, and finely ground oats with the hulls removed.

Keep bran, grit, shell, ground oats, green feed and fresh clean water before your chicks at all times. Chicks should have a supply of animal food or skim milk. Never allow milk to remain in vessels till it sours.

Self-feeding hoppers located in a dry place, containing bran, ground oats, and grit insure a constant supply of food to the chicks. Cracked grains should be fed in the litter.

If chicks drop their wings or appear to be sickly look for head lice. Head lice burrow into the head of the chick and can be killed by an application of equal parts of lard and sulphur.

Get your chicks on grass range as soon as possible. Green feed is necessary to rapid growth.

A wet mash of skim milk and ground oats may be fed to advantage occasionally by way of variety. Always feed clean wholesome food.

WILL REDUCED FREIGHT RATES LESSEN COST OF LIVING?

The Calgary Herald asks the following question editorially:

Now that those interested in the judgement delivered by the Railway Commissioners in the western freight charges case had had time to digest the condensed report of their decision, it has become apparent that shippers will be largely benefited, but the public generally are beginning to wonder what share of relief will be afforded them.

Take, for instance, the cut of 35 cents per ton in the rate for the carriage of coal from Lethbridge to Calgary; will the local coal dealers share this equally or in any proportion with their customers, or will they add this reduction to their own banking account and leave those who are warm-

ed by their coal out in the cold?

Will the reduction of 8 cents per 100 pounds on Raymond sugar lower the price of that commodity to the consumer, or will it all go into the grocery cash till?

Will placing cement on the Winnipeg basis make building, construction, less costly, or will contractors purchase the cement and pocket the extra profit?

Will the cut of from 20 to 50 per cent on local flour reduce the price of the ten cent loaf or increase its size and weight, and reduce the price of flour?

Will the reduction of the special mileage tariffs on vegetables to the Manitoba basis cheapen the cost of these products in this city?

Unless an affirmative answer be the reply to these and other obvious questions arising out of the judgement, it will favor only the shipper, and the consumer, who is the public, will derive no advantage from a long and costly investigation, the main object of which was to benefit the public as a whole which he owes to the public, and that is by reducing his price to them to permit them to share the benefit. Otherwise, the object of the Commissioners has miscarried.

ed by their coal out in the cold?

Will the reduction of 8 cents per 100 pounds on Raymond sugar lower the price of that commodity to the consumer, or will it all go into the grocery cash till?

Will placing cement on the Winnipeg basis make building, construction, less costly, or will contractors purchase the cement and pocket the extra profit?

Will the cut of from 20 to 50 per cent on local flour reduce the price of the ten cent loaf or increase its size and weight, and reduce the price of flour?

Will the reduction of the special mileage tariffs on vegetables to the Manitoba basis cheapen the cost of these products in this city?

Unless an affirmative answer be the reply to these and other obvious questions arising out of the judgement, it will favor only the shipper, and the consumer, who is the public, will derive no advantage from a long and costly investigation, the main object of which was to benefit the public as a whole which he owes to the public, and that is by reducing his price to them to permit them to share the benefit. FIRE PREVENTION

Manufacturers Take up a Worthing Cause—Executive Went in Canada From Fire

The Canadian Manufacturers' Association is continuing its propaganda for fire prevention which was organized a few months ago. The following timely paragraph, is circulated by the Secretary of the new movement. "It is an open question whether the careless fool or the deliberate criminal does the most damage by fire. Advantage seems to be with the fool, because he is every where, glancing bringing down destruction upon the fire bug must go about his deadly work stealthily. At word hours and in awkward places. Chief among the fools who carelessly cause fires is the smoker. His blazing match is cast down still alight. His cigarette ends fall into piles of paper or shavings. The hurried action of his trusty pipe descend gently into his ashtray and barrels of powder. If the fool destroyed only himself, the world could bear his actions without complaint, but he usually escapes while better men perish. In England, great wealth was accumulated by a man who was shrewd enough to locate small tobacco stores opposite factory entrances, but his fortune represented the loss of his fortune by the loss of his factories. One would think that the smoker would hesitate to light his pipe in the neighborhood of explosive liquids, but a recent report of the National Fire Protection Association of the United States shows that, out of 1,000 fires occurring in places where alcohol, gasoline and kerosene were stored, 200 were caused by the smoker and 135 by matches. The smokers' danger. Smoking should be absolutely prohibited in or about every Canadian factory, and employees violating this rule should be dismissed. If the rule became national, manufacturers could inform each other of these dismissals and could refuse employment to persistent offenders. If it were enforced there would be fewer fires, better work would be done, and the smoker would enjoy his weed more keenly in the evening, after a day's restful day."

If we changed the word "factory" to "shop," "house" or "stable" the article has a meaning for us all.

FOR MIXED FARMING

What a Prominent Farm Editor Says of the Canadian West

Mr. A. D. Penny, editor of "Farm Life," Chicago, writes his impressions of the Canadian West as follows: "Mixed Farming Chances." "While grain raising, that is to say, wheat raising, will probably remain for a long time to come, the chief product of Canadian farms, nevertheless, I was most favorably impressed with the opportunities open to the man who engaged in mixed farming and stock raising. I believe that with the possibilities for economical meat production, which this country appears to possess, the greater profits will be found in beef and pork production and dairying. The risk will be found much less and the returns more sure than in grain farming. In the districts surrounding the towns of Dauphin, Humboldt, Prince Albert, Vermilion, North Battleford and Edmonton we found conditions were adapted to stock raising and general farming. The natural broom grass and western rye grass make good growth here and provide economical feed in abundance. Timothy grows well and alfalfa is being experimented with, with good results. In fact, in the first two weeks of August we found pastures as green and as luxuriant as June meadows in the States. Hay is plentiful through out this section and stock is fat on ground barley, oats or frosted wheat."

The development of stock raising is still in its infancy here, nevertheless farmers are beginning in a small way and have already demonstrated that this line of farming brings in the most satisfactory returns in the long run. What is more, these farmers are building for the future and are laying the foundations for a permanent and progressive agriculture."

Good Vegetable Season. "I was greatly interested in the vegetable gardens found growing throughout Western Canada. Most of the common vegetables grow and flourish amazingly. With the exception of the tomato and sweet corn, common vegetables reach maturity. We saw cabbage, cucumbers, radishes, lettuce, pumpkins and squash equal to those grown in the States. Raspberries do well and we found strawberry patches which had just ceased bearing or near arrival."

There will be an ever increasing demand for the various products mentioned by Mr. Penny in the rapidly developing industrial regions of the West, such as Winnipeg, Calgary, Medicine Hat and numerous others.

ITEMS OF INTEREST

FROM THE M. C. I.

The Men's Christian League has formed a rugby football club. Mr. Arthur Wade is chairman. Mr. Howard Freeman, honorary secretary; Mr. Alf Womersley, captain; Mr. Fred Keal, vice-captain. We have the promise of good posts, grounds and a number of players. It is the intention of the club, as a start, to play a picked team from the Hat and district. As there are a number of players in the Hat this will give an incentive to have other clubs formed in the district.

THE RUNNING CLUB.

Mr. Kaching is now recruiting names for those who intend to take up running whether for the purpose of football or other sports or exercise. He has a list of names of those who intend taking this up.

There is no doubt a lot of talent in Redcliff, and the M. C. I. want to cooperate and bring it out. Practice will start next week. The M. C. I. will show their spirit in co-operation in the various interest, by having the two spacious rooms at the back of the club room fitted up with lockers, bathes etc. for the visiting as well as local teams.

MEN'S CHRISTIAN LEAGUE.

The concert last Friday evening was a real success. The selections were well rendered and practically all were entered. And the League was able to realize a neat little sum which will be used in maintaining the work which has been of great benefit to the men of the community.

Last Sunday, Mr. Atkins of Lethbridge, who was to have spoken for the men, was unable to be present on account of sickness. We were fortunately able to secure Mr. E. C. Davis, health inspector of Medicine Hat to fill the place. He gave some very valuable information regarding the protection of private and public health.

Next Sunday afternoon at 3 o'clock, the Rev. Arthur Harnes, Superintendent of Methodist Missions for Alberta will speak to the men on the subject: "Equipment for Service."

Make a special effort to be present. It will be well worth hearing.

For good buys on Broadway see the Broadway Specialists, J. L. Landis & Co.

ANNUAL MEETING OF CHURCH OF ENGLAND.

The annual meeting of the parishioners of the Church of England was held at the Village on Monday evening, when it was decided to build a church at once. Plans for the building, costing \$7,500, will be prepared at once, and the main portion only will be erected, costing \$5,000, to be completed as soon as the necessary funds are available. The cost of the building will be defrayed by subscriptions obtained by the Vicar, Rev. H. R. Gibson, on his recent visit to England where he collected the very large sum of nearly \$5,000.

The church will be erected on the site at the corner of Fifth avenue and Fifth street, north, given by Messrs. Stoner, Lockwood and Wheeler, whose the vicarage now stands.

The building committee is fortunate in securing the services of Mr. Ash with, our city engineer as chairman. Additional subscriptions are needed for the furnishing of the church and are urgently asked for.

DEPARTMENT OF EDUCATION PUBLIC NOTICE

(At Least Five Notices Must be Posted Within the Limits of the District)

By the Hon. the Minister of Education, Province of Alberta.

WHEREAS it is deemed expedient by the Board of Trustees of the Redcliff S. D. No. 2283 of the Province of Alberta, that the sum of twenty-five thousand dollars should be borrowed on the security of the said District by the issue of Debentures repayable to the bearer in twenty equal consecutive annual instalments with interest at the rate of not more than eight per centum per annum for the following period, to-wit:—

First, three school sites, building of solid brick and furnishing three one-room schools and janitor's house, and fencing present school house.

THEREFORE, notice is hereby given by the Board of the said District that unless a sufficient number of ratepayers of the said District for and against the said debenture loan is obtained as provided by the School Ordinance and said Board will apply to the Minister of Education for authority to borrow the said sum by debentures.

Of which all persons interested are hereby notified, and they are required to govern themselves accordingly.

D. BROADFOOT, Chairman.
Dated at Redcliff, Alberta, this 18th day of April, 1914.

Instructions to Ratepayers.—In rural districts a poll on a debenture loan may be demanded by any five ratepayers if the loan exceeds \$15,000, or if the loan is not for the purpose of building a first school house.

In town and village districts a poll may be demanded on any debenture loan by twenty and ten ratepayers respectively.

Every demand for a poll should be delivered to the secretary of the district or in his absence to the chairman of the board within fifteen days from the date of posting the notice. A certified copy of the demand should be forthwith forwarded to the Department of Education.

ITEMS OF LOCAL INTEREST.

The W. A. will meet at Mrs. Chadwick's next Wednesday at 2:30.

Mrs. Parr and her son, who have been visiting with her brother, Dr. Way for the past six weeks, returned to their home at Duck Lake, Sask., this week.

Lon Barber has a fine new delivery wagon on the road this week. It looks quite smart in its new dress of pure white paint.

A meeting to organize a tennis club will be held in Mr. Chadwick's office next Tuesday evening. All interested are asked to attend.

Dr. Steiner, who has been down in several Saskatchewan cities and as far east as Winnipeg on business, returned home last Monday.

Mr. James Braden, of Ironton, Ohio, arrived in town this week and will spend the summer here looking after his interests.

The public school has been closed for another week owing to the illness of the principal.

Word has been received that steel is now laid within 60 miles of Winnipeg and that it may be expected to reach that point in a little over thirty days.

Christie is all excited over what is supposed to be the discovery of oil on the farm of Wm. H. Schloesser, three miles south of town.

Mr. John Q. Landis, of Greenview, Ohio, with his wife and family, arrived here last Sunday and will reside here in future. Mr. Landis has some valuable property in Redcliff.

The manager of the Overland Departmental Store has purchased two lots in Lockwood subdivision and intends erecting a building on them to be used as a branch store.

We are informed a number of young men from here intend going up to the Peace River district to take up homesteads.

Mr. C. S. Pingle, member of the constituency in the Alberta legislature, has donated a set of medals for the winners of the Medicine Hat-Redcliff Football League.

The plans for the new English Church have been submitted to the building committee. We understand they are quite satisfactory and that work will be commenced at once.

A number of the members of the K. of P. lodge have attended the lodge and social given by Rathbone Lodge, Medicine Hat, last Monday evening. They report a most enjoyable evening.

Mr. T. C. Hill, one of the pioneer real estate men of Redcliff, has opened up an office on Broadway. Mr. Hill says at present he has a small office but a big business.

The Stoner, Lockwood and Wheeler, Ltd., Company, and the Redcliff Realty Company held their respective annual meetings last Monday. The same officers for both companies were re-elected for the ensuing year.

A special train of Winnipeg business men intend making a trip through the West next month. They will pass through Redcliff about the 25th.

Mr. B. S. Spaulding's new warehouse is now about completed. It is expected to be ready for storing a complete line of builder's supplies by next week.

Mr. Hies has been asked by the Clayworker of Toronto to furnish that

magazine with a write up of the brick plants here. This is being done and will appear in next month's issue with cuts of the different plants.

The professional baseball season opens in Medicine Hat on May 4. The opening game will be with Regina. Judging from reports every team in the league has a strong line-up and the latter bringing home one of the largest we have ever seen. Mr. Landis, who was also with the party, says he could have shot six but he wanted to save his shells for the traps.

Four boys claim the church is submitting to the ratemakers notice on page six of this issue.

A party of rangers went out after the wily game last Saturday evening. Messrs. Lockwood and Woodcock were successful in bagging one each, the latter bringing home one of the largest we have ever seen. Mr. Landis, who was also with the party, says he could have shot six but he wanted to save his shells for the traps.

Damage to the extent of half a million dollars was done by a fire on the premises of the Alberta Lumber Company in Vancouver last Saturday. The blaze originated in the boiler house. The yards contained millions of feet of lumber and was a total loss.

The C. P. R. has given the contract to George Webster of Calgary, for the grading of 25 miles of track east from Stirling, Alberta, being a continuation of the branch from Letbridge to Weyburn. The grading is to be completed this year.

In the event that was should break out between the United States and Mexico it is not improbable that a company of veteran fighters from Calgary who have seen service under the Union Jack will tender their services to the secretary of war of the United States.

At the last meeting of the Medicine Hat City Council Mayor Brown stated that Mr. Pingle, the member for Redcliff, has promised to do all he can to assist in getting government aid in rebuilding the grade on the road to Redcliff.

Mr. George, Constable of the Redcliff Hotel, received word that his mother was seriously ill at her home in the Old Country. George was unable to leave at present, but his brother Charles, left for home last Wednesday.

As they have an abundance of window space it is the intention of the Overland Departmental Store to set aside a portion of their third street display windows to be used to exhibit the product of Redcliff's several industries.

UNCLASSIFIED ADS.

district. The manager of the different factories are entering heartily into the scheme and we look for something pretty nifty. The manager of the store will be pleased to make arrangements with any who have anything in this line to exhibit.

Moving pictures of antelopes under some natural conditions, are being obtained north of Lethbridge by a moving picture company of Edmonton. The herd, a large one, makes its headquarters near the home of Charles Blaser, a well known hunter. Mr. Blaser is very conversant with the habits and is securing the pictures.

Peter V. Verigis, president, and J. W. Shandelin, manager, of the Christian Community of Universal Brotherhood; Doukhobors in Canada, were in Medicine Hat last week, their object being to look into prospects for work for Doukhobor men and their horses in connection with contracts for work with the Southern Alberta Land Company.

Mr. W. E. Brown, manager of the Union Bank at Piapot, Sask., was a visitor in town for a few days this week. When asked what he thought of Redcliff, Mr. Brown said it certainly was an eye-opener to him. He had heard this was a thriving industrial town, but he had no idea we had so many big flourishing manufacturing establishments. Seeing is believing, and in future he will believe anything he hears about Redcliff's development.

Seeding throughout the province is now general and it is estimated that 100,000 acres more than last year will be under crop in 1914 in Alberta. Prominent grain men are of the opinion that the yield this year will be the largest and best on record. Conditions are excellent and reports from every section are most encouraging.

Several cattle breeders in this district purchased a number of pure bred bulls at the live stock show held in Calgary last week.

Turf to a depth of two inches has been put on the diamond in the Hat ball ground. This will make a big improvement in the infield.

During the last week we have sent out some reminders to subscribers who have overlooked their renewals to The Review. The response has been very gratifying, one subscriber

in renewing, said: "I trust that the current year will see a rough period as pleasing and successful as during the past."

On and after Mar 2 all the lumber yards in town will close down every Saturday afternoon at 1 o'clock. This will continue during the summer months.

Houses to Rent, well situated, rates very reasonable. Gladly shown upon application. A. J. Nicholson, phone 57; office on Broadway. 177

HOWARD Rail-road Watches
(over-riding) are officially certified and adopted by the time inspectors of our hundred and forty of the leading railroads of America. Better than this, their daily performance is finer, more accurate than the most exacting railroad requirements. The balance-wheel of the Howard Watch is made of special hard-tempered steel—and will not break out of true with the jar and vibration of railroad service. Howard watchmakers make and set every Howard as you watch. Check it in the factory and find it to be true. Personal order from the price—railroad models \$5 to \$10. Let us show you this distinctive watch.
